

TEC Lite Skin® Cruise Laminate

dimension
polyant

The TEC line will be available in both traditional white and a matching grey color to coordinate with existing woven and Lite Skin® sails in a sailor's inventory. Fabric attributes include a lighter finished weight than previous offerings, soft hand for ease of sail handling, reduced water absorption, chafe resistance and UV stability. The Lite Skin® external layer is treated with UVt®, DP's proprietary UV and anti-microbial finish to increase UV protection while deterring mildew growth. TEC will incorporate a 100% polyester scrim and X-PLY® construction in the lightest three versions. For larger yachts, the base scrim will be blended with Ultra-PE to reduce stretch and increase tear strength.

STYLE	WEIGHT	WARP/FILL		X-PLY®	WIDTH
LS + 1Mil	Sm-oz	Count	Polyester	Polyester	mm
TEC - LS - L	6.5	9.6 x (4+1)	1000 x 500/1000	30° 1000D	1500
TEC - LS - M	7.0	12.5 x (3+2)	1000 x 500/1000	30° 1000D	1500
TEC - LS - H	8.0	18 x (2+3)	1000 x 500/1000	30° 1000D	1500
TEC - LS - UPE*		*Three weights with increasing counts of Ultra-PE scrim for yachts 40+ feet
